Information Disclosure Statement

Commissioner for Patents

Alexandria VA 22313-1450

Sir:

Attached is a completed Form PTO/SB/08(A&B) and copies of the pertinent parts of the references cited thereon. Following are comments on any non-English-language references pursuant to Rule 98:

Sapozhnikov N. (Strength Safety of Precast Reinforced Concrete and Prestressed Structural Members, Moscow, 1989) consider test results of thousands of precast reinforced and prestressed concrete members designed according to the Russian building code, produced and tested on the Russian plants of precast concrete. These test results were used for the estimation of the strength safety level of real structural members.

Sapozhnikov N. (Safety of Precast Reinforced Concrete and Prestressed Structural Members by the Second Limit State, Moscow, 1991) consider the safety of the prestressed flexural members in terms of cracking resistance basing on the test results of precast prestressed concrete members and on the statistical investigation of the flexural strength in connection with the compressive strength of concrete. This investigation was carried out by the processing of results of 3,650 series of American test of standard concrete cylinders and beams and 1,107 series of modified cubes and standard beams.

Very respectfully,

Applicant(s): N. Sapozhnikov
